Professional Summary

Frontend Developer with a strong passion for creating responsive, high-performance web applications using **React.js** and **Redux Toolkit**. Skilled in building clean, scalable, and user-centric interfaces with a focus on modern UI/UX standards. Experienced in delivering impactful projects, including a movie listing platform, an engaging e-commerce store, and a personal portfolio showcasing frontend expertise.

Proficient in **JavaScript**, **HTML5**, **CSS3**, and modern development best practices. Constantly learning and evolving with the latest tools and frameworks. Dedicated to writing maintainable code and enhancing user experience and performance. Seeking to contribute to a dynamic team where I can grow professionally and collaborate on innovative solutions.

Education

Mansoura University (MET Academy)

Sep. 2023 – May 2027

Bachelor of Computer Science

MET Academy

Relevant Coursework

- Basics Programing
- Data Structures
- Software Methodology
- Systems Programming
- OOP
- Algorithms Analysis
- Database Management
- Web Developing

Experience

Startup

JUL 2025

Front End Developer Intern at @ DEPI

DEPI

- Assisted in development of the front end of a Website using Js and the React Js framework.
- Worked with Google Firebase to manage user inputted data across multiple platforms including web
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.

Projects

Netflix Clone Movie App | *React Js , Tailwind Css , Firebase*

- Solo project built with React.js, Tailwind CSS , Firebase
- Fetched movie data from the TMDb API, implemented user authentication, and used React Router for navigation
- Live Demo : <https://netflix-blue-three.vercel.app> , Github : <https://github.com/Omar-Kamall/netflix.git>

E-Commerce Website | *Html , Css , Bootstarb , JS , Swiper JS*

- Solo project built with JS, Bootstrab
- Built a responsive online store with shopping cart functionality, including add/remove features.
- Fetched product data from a local JSON file simulating an API.
- Live Demo : <https://e-commerce-zeta-plum.vercel.app> , Github : <https://github.com/Omar-Kamall/E-Commerce.git>

Exclusive E-Commerce | *React Js , Redux JS , Tailwind Css , Firbase , Formik , Yup*

- Solo project built with React JS, Redux Toolkit
- Implemented shopping cart functionality, form validation using Formik and Yup, and user authentication via Firebase
- Used a Fake API to simulate product data and managed global state with Redux
- Live Demo : <https://exclusive-ecommerce-five.vercel.app>.
- Github : <https://github.com/Omar-Kamall/Exclusive-Ecommerce.git>.

Tiba Care | *React Js , Tailwind Css , Formik , Yup , SweetAlert*

- I built the system in partnership with Back End React JS, Spring Boot , PostgreSQL
- Full-stack medical dashboard project built individually using React.js, Tailwind CSS, CSS, and EmailJS on the frontend, with a Spring Boot backend and PostgreSQL database
- Implemented JWT-based authentication, secure dashboard routing, and full CRUD functionality (Add, Update, Delete) using Axios for client-server communication
- Integrated SweetAlert for interactive user feedback and EmailJS for automated email sending
- Live Demo : <https://tiba-medical.vercel.app> , Github : <https://github.com/Omar-Kamall/All.git>

Technical Skills

Frontend: HTML , CSS , JavaScript , TypeScript , Nodejs

Additional Languages: C++, Python , C Sharp , C

Database: SQL , MYSQL , Mongo DB

Technologies/Frameworks: React Js , Express Js , Redux Js, Tailwind Css , Bootstarb , Git, GitHub

Developer Tools: SQL Server , Postman , Cursor
